

Guardian Audio® Power and Processing

Guardian Audio® Heavy Duty power amplifiers are designed with the professional in mind. A combination of rugged and functional. Professional features like toroidal coils, cooling fans, aluminum faceplates, balanced XLR and 1/4" connections, speakon and binding post speaker outputs and built in protection circuits.

All Guardian Audio® equalizers use Constant Q Filters, selectable cut/boost ranges of $\pm 6\text{dB}$ or $\pm 12\text{dB}$, balanced in and out, RFI filtering and a bypass that disengages all circuitry. The EQ231L and EQ215s have a sub out with a variable crossover. The electronic crossover is stereo 2 way or mono 3 way with bass boost and a crossover slope of 12dB per octave.

Model	Power x 2 @ 8 Ohms	Power x 2 @ 4 Ohms	Power x 2 @ 2 Ohms	Power Bridged @ 8 Ohms	Power Bridged @ 4 Ohms
